Nutrient- and light-limited growth of *Thalassiosira fluviatilis* in continuous culture with implications for phytoplankton growth in the ocean

There is an error in Table 1 of our paper, which appeared in *Limnol. Oceanogr.* **25**: 457–473, 1980. The correct carbon per cell at a growth rate of 1.15 per day is 176 picograms, not 149 picograms.
